【Disclosure based on principles of Corporate Governance Code】 Revised

【Principle 1.4 Cross-Shareholdings】

The Company holds shares of business partners and others for realizing sustainable growth and enhancing our mid- and long-term corporate value when we determine that such shareholdings would contribute to creation of business opportunities, business alliances as well as establishment, retention, reinforcement, etc. of stable transactions and cooperative relations.

Appropriateness of individual cross-shareholdings is examined by the Board of Directors every year. The Company makes a comprehensive judgment on the accompanying benefits, risks, and other factors of holdings taking into consideration nature, scale, and other factors of transactions and setting qualitative criterion including aspect of enhancement of corporate value as well as quantitative criterion including comparison with capital costs. Once a stock is decided to be sold, then the company shall advance reduction.

The Company exercises the voting rights under cross-shareholdings examining for each agenda from the viewpoint of conditions of their operation, contribution to raising our mid- and long-term corporate value and whether subject agenda does not spoil stakeholders' value while respecting the management policy of the companies in which we hold shares. As specially focused agendas, the Company assumes introduction of anti-takeover measure, business reorganization, agendas relating to appointment of directors in the cases of continuously deteriorating business performance, etc.

【Principle 1.7 Related Party Transactions】

When Directors and Audit & Supervisory Board Members of the Company assume the post of officers in other companies concurrently, approval must be obtained from the Board of Directors.

Transactions involving conflict of interest between the Company and Directors are required to obtain prior approval from the Board of Directors, and regular reporting on material facts to the Board of Directors about such transactions has enabled the Board of Directors to monitor them appropriately.

In addition, we disclose related party transactions appropriately pursuant to the applicable laws, regulations and accounting standards.

【Principle 2.6 Roles of Corporate Pension Funds as Asset Owners】

In order to ensure appropriate management of corporate pension, the Company has established a Pension Management Committee consisting of personnel having appropriate capacity, such as Officers or Executive General Managers in charge of finance, human resources, and audit divisions. The committee hears opinions from asset management institutions, etc., and conducts regular monitoring on the status of management, and it makes decision on investment policy of pension assets, selects entrusted management institutions, and conducts reviews on investment products, asset allocation, etc. The Fund avoids conflicts of interests between the fund beneficiaries and the Company by entrusting the management of its pension fund to trust banks and life assurance companies.

The standard for electing Directors includes that they must have a great deal of experience and knowledge in their respective fields, that they must be capable and qualified managers, and that they must have a wide-ranging view of global business management.

For candidate of Outside Directors, the Company looks for people who have a broad range of knowledge, experience and sufficient achievements in their field of origin, and who satisfy the Company’s “Standard for Independence of Outside Directors and Audit & Supervisory Board Members” in order to strengthen their ability to supervise management.

For candidate of Audit & Supervisory Board Members, the election standard includes that the candidate must possess a high level of knowledge and proficiency in auditing all fields of the Company's business, including auditing accounts.

For candidate of Outside Audit & Supervisory Board Members, the Company looks for people who have a high level of specialist knowledge and a great deal of experience in finance, accounting, technology, legal affairs, etc., and who satisfy the Company's "Standard for Independence of Outside Directors and Outside Audit & Supervisory Board Members" in order to strengthen the neutrality of the auditing system.

For both candidate of Directors and candidate of Audit & Supervisory Board Members, the Company does not consider whether within or without company, gender or nationality.

The suitability of candidate of Directors and candidate of Audit & Supervisory Board Members is deliberated by the "Committee on Personnel and Remuneration, etc.," of which Outside Directors make up half or more of the membership, and based on the result of this deliberation, and with the assent of the Audit & Supervisory Board in the case of candidate of Audit & Supervisory Board Members, the Board of Directors then decides on the candidates to propose for election as an agenda item for the General Meeting of Shareholders.

<<Human Resources and Human Capital>>

The Company's mission statement sets three goals that all employees of the group should understand and pursue: (1) to make efforts to fulfill corporate social responsibility (product development), (2) to make efforts for the organization to which you belong (company development), and (3) to make efforts for yourself (human resources development). Based on these goals, the President himself has taken the lead in implementing reforms in human resources development, believing that "human resources development is the company's first priority." In October 2022, the Human Resources and General Affairs was reorganized to the Human Resources Development with the aim of focusing on developing human resources unique to Suzuki, who embody the company mission statement and the philosophy of conduct.

The Company is now experiencing a once-in-a-century upheaval in which carbon neutral society is to be realized as a social mission and the appearance of CASE vehicles is transforming the automotive industry. To address these major changes that we can never achieve as a conventional automaker, the Company has been striving to recruit and develop a diverse range of human resources, including those who boldly take on new challenges, those who generate new ideas with their diverse experience and values, those who have highly specialized skills, and those who can play an active role globally.

As stated in the Company's mission statement, we are committed to creating a corporate culture that encourages employees to try challenging tasks and keep making efforts so that individuals with different personalities can demonstrate their abilities toward common goals, produce higher value-added results, and continue to work energetically while finding their job rewarding and worthwhile.

For immediate initiatives, we will listen to the voices of our employees more than ever before, engage in careful dialogue between labor and management, and carry out reforms of personnel and general

affairs operations such as making drastic changes to the personnel system, conducting radical business process re-engineering, implementing work style reform, and improving various working conditions to make sure that each and every employee is happy to work at Suzuki.

<Diversity of Human Resources>

To secure a diverse workforce, in recent years we have been trying to hire more mid-career recruits as well as new graduates. In fiscal year 2022, the Company hired 105 mid-career recruits (244% (+43 people) compared to the previous fiscal year). In fiscal year 2023, we're acquiring outside strength with good speed and have already hired 84 mid-career recruits (as of the end of April). The Company also introduced an unconventional form of employment in June 2023 to hire people who have the knowledge and experience that none of the existing employees have.

The Company is focusing on recruiting digital personnel to develop next-generation technologies. The Company has been directly hiring graduates of the Indian Institutes of Technology since 2018 (10 people as of April 2023) and working with Maruti Suzuki India Limited in order to further improve our competitiveness in the Indian market, where we have been strong and successful.

The Company is working to be a company where women can play an even more active role. To this effect, the Company is started to increase the number of new female graduates in 2015. In addition, in 2020, the Company is started to increase the number of female workers with job titles who can be candidates for managers. This is based on the plan to triple the number of female workers at the rank of assistant manager and higher by 2025 as compared to 2015. As a result, the number of female workers with job titles in fiscal year 2022 was 156, an increase of 2.94 times from fiscal year 2015.

However, the number of female managers was 21 (1.6% of all managers) in fiscal year 2022. The Company is in the process of reviewing our personnel system to ensure that all employees, regardless of position, job type or gender, are entrusted with tasks in accordance with their abilities and are treated accordingly. The Company believes that it is reasonable from the standpoint of fairness that the ratio of female in all positions, including general employees, employees with job titles and managers, is approximately equal to that of male. The ratio of women to total employees (12.4% in fiscal year 2022) is set as a future target for the ratio of women in managers. Setting the fiscal year 2025 target at 2.0%, we intend to reform the personnel system, improve the environment and develop human resources.

As the Company recognizes the low ratio of women in the automotive industry as an issue to be fixed, we will work to thoroughly improve the working environment through innovations in production technology and other measures so that all employees can work comfortably in any of our workplaces including production plants, regardless of gender, age or disability.

The Company has also eased the conditions for the shorter working hours system so that employees can balance work and parenting more easily. The system was previously intended for employees who raise children up to the third grade of elementary school, but since 2023, it has been expanded to include employees who have children up to the sixth grade of elementary school. In addition, in accordance with the Act on Advancement of Measures to Support Raising Next-Generation Children, our company obtained "Kurumin" certification in 2022 from the Minister of Health, Labour and Welfare as a child-rearing support company that meets several requirements for balancing work and parenting.

As of March 2023, 5.9% of our employees are 60 years of age or older. The Company has revised our re-employment system for managers to ensure that those employees can make the most of their past experience and knowledge and can work actively while taking their physical fitness and health into consideration. How to treat them has been improved.: As long as the job role they play after reaching the age of 60 remains almost the same, they can be treated the same as before retirement.

In the future, the Company will expand the scope to include union members to encourage active participation of experienced personnel regardless of their position.

Although the Company hasn't set a target for promotion of mid-career recruits and foreign employees to managerial positions, we intend to recruit, train and promote them regardless of their type of employment or nationality.

<Investment in Human Resources Development and Human Capital>

Superficial cause analysis and hasty responses were occasionally seen in daily work, causing rework, unnecessary work and more shortage of manpower. In June 2021, the Company began implementing a company-wide problem-solving method to improve each employee's ability to identify the root causes of problems and solve them. This method has been shared, instilled and

established in project teams, and since fiscal year 2022, it has been incorporated into company-wide training programs.

Returning to our company's original entrepreneurial spirit of "rising to the challenge and carving out a future for yourself," the Company began to send young employees to start-up companies with the aim of helping them not only broaden their horizons and knowledge but also increase their external antennae. In Japan, the Company has been dispatching such employees to m2labo, Inc. since 2020, and to SkyDrive Inc. since August 2022, to sow seeds and develop flying cars as one of the new mobility businesses following four-wheel, two-wheel and marine. Overseas, the Company has sent young employees from various headquarters to India, where digitalization is progressing rapidly, through the Suzuki Innovation Center (SIC) since November 2022. With the aim of solving everyday problems, students at Indian Institutes of Technology and these employees share ideas to develop IT products and launch activities to create innovations that can contribute to society.

New areas, including preparation for CASE, are mainly addressed in Japan, while existing areas are being transferred to India. To provide more intensive education to Indians, the Company is committed to improving the development capabilities in India and enhancing the competitiveness of Suzuki as a whole by having Maruti Suzuki India Limited and other local Indian human resources work together with Japanese human resources.

The Company started to send employees to Silicon Valley in September 2017 to give them the opportunity to learn "design thinking," an approach to problem solving, so that they can acquire the "venture mentality" to take on challenges without having fear of failure. To learn from local startup companies that embody the spirit of our mission statement, "For the customer," the Company sent employees to Silicon Valley 16 times so far, 173 people in total, and since the outbreak of COVID-19, we've conducted training online an additional 10 times for a total of 103 employees. People with a diverse range of positions and ranks, from executives to younger employees, including the President himself, have participated in the training and learned the design thinking and the mindset to take on challenges without having fear of failure. After that, they utilize these things in daily work, new projects and human resource development.

The movement to identify and solve issues using digital technology is rapidly accelerating, and the number of initiatives and decision-making on digitalization is rapidly increasing in the company, too. Thus, we are working to equip all employees, including executives and general managers, with the purpose of using digital technology, and digital literacy, knowledge and skills.

Key initiatives in digital education:

- The management takes the initiative to change their *o*, not just awareness (e.g. use digital materials instead of paper materials)
- 50% reduction in indirect operations with the use of digital technologies under the slogan of "Simple Work!"
- Renovation of core business systems (introduction of ERP) to achieve data-driven management
- Company-wide education to promote data utilization
- Close connection between our customers and our company at every customer point of contact to meet their needs
- Training and posting of in-house digital personnel to speed up digitalization

<<Investment in Intellectual Property>>

The Company has the motto "Develop products of superior value by focusing on the customer" in the first paragraph of its mission statement. Our intellectual property activities are based on acquisition of rights to the knowledge and technologies that create such value as well as accumulation, protection and utilization of such knowledge and technologies as intangible assets.

The entire company is working together globally to identify and deliver the value that customers in each region truly need. A wealth of knowledge and data gained through this process is viewed as an important intangible asset of the Company, which we manage appropriately and utilize in products and services that are unique to the Company. Based on our traditional philosophy of conduct, "Smaller, Fewer, Lighter, Shorter, and Beauty," the Company realize the value that customers really need and respond to diversified needs of customers and society by designing and developing products with unique wisdom, ingenuity and ideas that will make the products that are "truly Suzuki" and unexpected to customers, and we acquire the rights to the products through patents and other means.

With the aim of promoting such intellectual property activities in a company-wide manner, the Intellectual Property Promotion Committee has held meetings and engaged in multifaceted discussions since March 2022, in which directors, managing officers and general managers participate. As a result, the

Company is building a foundation and structure for employees to actively engage in intellectual property creation. Please also refer to the Integrated Report for specific activities and results.

【Supplementary Principle 4.1.1 Scope of delegation to management】

The Board of Directors is clearly defining the matters to be resolved at its meetings including those required by laws, regulations and the Articles of Incorporation. Also, the Company is taking measures for agile execution of operation and to clarify the individual responsibilities such as introduction of Managing Officers System and revision of organization structure as necessary, and has established an internal regulation on approval standard for execution of operation by Directors and Managing Officers.

To quickly deliberate and decide important managerial issues and measures to be taken, the Company holds Executive Committee attended by Representative Directors and other Directors and Managing Officers concerned periodically and whenever necessary.

【Principle 4.9 Independence Standards and Qualification for Independent Directors】

【Supplementary Principle 4.11.3 Evaluation of the Effectiveness of the Board of Directors】

The Company analyzes and evaluates the effectiveness of the Board of Directors every year. The following is a summary of the analysis and evaluation for fiscal year 2022.

(1) Method of evaluation

As in fiscal year 2021, we focused on the Board's challenges to strengthen our company's competitiveness again.

From March to April 2023, individual interviews were conducted with Directors, and group interviews were conducted with Audit & Supervisory Board Members. With the subsequent discussions at the Management Committee taken into account, future initiatives were confirmed by the Board of Directors.

(2) Summary of results and initiatives in fiscal year 2021

a. Summary of results

- 1) The agenda for discussion of the company's direction should be set more carefully.
- 2) Points for decision-making should be described more clearly in explanatory materials.
- 3) Progress on business execution should be reported more frequently.
- 4) Material description should be shortened and streamlined, and more time should be spent on deliberations.
- 5) It is desirable that board members have some time to have a casual discussion and exchange views with each other.

b. Initiatives

- 1)&3): Scheduled agenda items were set in advance and discussed at the Board of Directors meetings in order.

- 5): At the proposal of the Chairperson of the Board of Directors, the board members have an opportunity to freely exchange their views after a Board of Directors meeting.

(3) Summary of results and initiatives in fiscal year 2022

a. Summary of results

We have received the following feedback from the outside directors: they have no complaints about the explanation itself and the deliberation time is appropriate; they are grateful that the Chairperson of the Board of Directors has taken care so that they can express their opinions candidly and that discussions held in other meeting bodies are made available before they attend a Board of Directors meeting; and the Board of Directors as a whole is functioning well.

On the other hand, problems have been identified in the following three issues and set as priority issues for fiscal year 2023, based on suggestions including those made by outside directors.

- 1) Selection of topics for deliberations, resolution and reporting
- 2) Scheduling and advance preparation for submitting proposals to the Board of Directors
- 3) When to distribute materials in advance and how to prepare and explain materials

b. Initiatives

To achieve the goals of the Company's Growth Strategy for FY2030 (as announced on January 26, 2023), we will make further improvements by setting appropriate agendas, ensuring more detailed scheduling including advance preparation of proposals to the Board of Directors, enhancing explanatory materials and streamlining explanations, etc.

【Supplementary Principle 4.14.2 Training policy for Directors and Audit & Supervisory Board Members】

The Company implements trainings that allow Directors and Audit & Supervisory Board Members to deepen their understanding of their respective roles, responsibilities, etc. We intend to make the training an opportunity in which Directors and Audit & Supervisory Board Members take part together in principle, so that they can share the information on their respective roles, responsibilities, etc.

When a new Outside Director or a new Outside Audit & Supervisory Board Member assumes post in the Company, the Company will explain to the person the corporate philosophy, lines of business, finances, organizations, etc. In addition, the Company will prepare opportunities, such as interaction with Directors, Managing Officers and employees in the Company, attending various meetings relating to business operation and management, and joining factory inspections, to ensure that the person can deepen understanding of the Company.

265 of the 363 meetings (73%) were held online during fiscal year 2022, including conference calls and web meetings. Online meetings enable us to have meetings with a large number of overseas institutional investors. Of the 891 companies we had meetings within the fiscal year ended March 2023, 571 companies (64%) were overseas institutional investors.

<Main Dialogue Topics>

22 of the 363 meetings (6%) were on ESG, including meetings with persons to exercise voting rights.

At the ESG meetings, we exchange a wide range of views about measures for carbon neutrality, growth strategies, human rights, women's empowerment, corporate governance, etc.

(4) Feedback
